\$75

APEKS 90 DEGREE FIXED ELBOW

The Apeks 90° Fixed Elbow is perfect for divers using twinsets or sidemount set ups that need a hose to route 90° without kinking and damaging the hose.

The elbow allows much more natural hose routing and still allows the second stage to swivel as it should.

\$30

Cressi Blower with Ring and Carabiner

Low pressure blower connectable to any LP hose with bayonet connection (inflator or dry suit).

Very useful for cleaning or drying delicate equipment elements.
Orientable flexible tip.
Inox ring and plastic snap hook.

ARTEK Dolphin MK2

The diving light Dolphin MK2 is the evolution of the most compact model of ARTEK.

It has been designed to offer a higher power (550 lumen) and more light penetration during immersion. Impress its size-power ratio.

It reaches the impressive quantity of 20.500 lux at 1 meter. It allows squeezing out all the battery runtime without worrying on sudden shutdown. Big

\$255

ARTEK Tigershark MK2

The diving flashlight Tigershark mk2 is the evolution of the intermediate model of the range products ARTEK®.

It has been designed to deliver 850 lumens of light output with higher light penetration during immersion. Perfect compromise between power and size.

The combination of a specially selected quality LED and the aluminium reflector designed by ARTEK® makes possible to have a beam of more than 30.000 lux at one meter.
